🎓 EDUCATION

Engineering Degree in Big Data & Cloud Computing

École Normale Supérieure de l'Enseignement Technique, Mohammedia

2023 – 2026 | Mohammedia, Morocco

Preparatory Classes – Physics, Chemistry & Engineering Sciences

CPGE ERRAZI

2021 – 2023 | El Jadida, Morocco

👤 Profile

Big Data & Cloud Computing Engineer specializing in **Data Analytics, Business Intelligence, and AI**. Proficient in **SQL, Python, and Power BI**, with experience in **Data Warehousing, ETL, dimensional modeling, and AI solutions**. Skilled at turning data into actionable insights and decision-making tools. **Seeking a junior opportunity in Data, BI, or AI.**

💡 SKILLS

Data Engineering & Big Data

Python, ETL, Apache Kafka, Apache Spark, Hadoop, PostgreSQL, MySQL, NoSQL, Data Pipeline Automation

Data Analysis & Business Intelligence

SQL, Power BI (DAX, Power Query/M), Tableau, Grafana, Apache Superset, Advanced Excel, Data Visualization, Reporting, KPI Monitoring, Statistical Analysis, Decision Support, Star Schema Modeling, Data Quality

Cloud, DevOps & Automation

Git, GitHub, GitHub Actions, Jenkins, Docker, Kubernetes, Terraform, AWS, Power Automate, SharePoint

Artificial Intelligence & Machine Learning

Deep Learning, Computer Vision, Natural Language Processing (NLP), Model Training & Evaluation

Tools & Frameworks

TensorFlow, scikit-learn, OpenCV, Pandas, NumPy, Matplotlib

Functional Analysis

Requirements gathering & analysis, functional specifications, user stories, business workshops, User Acceptance Testing (UAT), documentation, Agile/Scrum

Programming Languages

Python, SQL, Java, JavaScript, C, C++

Soft Skills

Active Listening, Problem Solving, Teamwork, Communication, Research Skills, Adaptability

Languages

French (Fluent), English (Fluent), Arabic (Native)

📜 Certifications

- Data Analytics Essentials -Cisco
- Scrum Fundamentals – SCRUMstudy
- RGPD-CNIL
- Machine Learning Specialization -Coursera
- Introduction to IoT and Digital Transformation -Cisco
- Networking Essentials -Cisco
- Introduction to the Threat Landscape 3.0 -FORTINET
- Cyber Threat Management-Cisco

📁 PROJECTS

Operational Reporting & KPI Monitoring

- Analyzed commercial and operational data and developed Power BI reports to monitor performance.
- Designed and automated data processing workflows using Python and SQL, reducing analysis time by **70%**.
- Developed KPIs, DAX measures, and interactive visualizations to facilitate performance monitoring and decision-making.
- **Technologies:** Power BI, SQL, Python, DAX.

Pipeline Big Data – Smart City Traffic Analytics

- Developed an end-to-end Big Data pipeline for real-time traffic data collection, processing, and visualization, integrating streaming, distributed processing, and workflow orchestration.
- **Technologies:** Python, Apache Kafka, Apache Spark, HDFS, PostgreSQL, Grafana, Apache Airflow, Docker.

Pipeline Big Data – Analyse de Logs E-commerce

- Developed a Big Data pipeline for processing and analyzing e-commerce logs, integrating distributed storage, parallel processing, SQL analysis, and data visualization.
- **Technologies:** Java, Hadoop, HDFS, MapReduce, Apache Hive, Apache Superset, ETL.

🏢 PROFESSIONAL EXPERIENCE

Data Engineer / Data Analyst Intern (Final-Year Project)

Scalian Morocco – Client: Alstom

02/2026 – 08/2026 | Casablanca , Morocco

- Analyzed business and technical requirements related to the improvement of test campaign validation and reporting processes.
- Designed a **Data Warehouse and ETL pipeline** to centralize and structure test data for analysis and reporting.
- Developed **Power BI dashboards and KPIs** to monitor campaign performance and support data-driven decision-making.
- Implemented an **alert engine** to identify anomalies and performance issues across test campaigns.
- Developed a **RAG-based conversational assistant** to enable natural-language access to test results.
- Contributed to the automation of HMI test verification using **Computer Vision and OCR**.
- Prepared and executed integration and validation tests within an **Agile/Scrum** environment.
- Created and maintained functional and technical documentation.
- **Technologies:** SQL, PostgreSQL, Python, Power BI, ETL, RAG, LLM, FastAPI, OpenCV, Tesseract OCR, Docker, Git, Scrum.

Software Engineer Intern

Alanyo IT

07/2025 – 08/2025 | Sidi Kacem, Morocco

- Designed and developed **NutriBot**, a serverless nutrition chatbot using AWS and the Gemini API.
- Integrated an external **API** for food analysis and personalized recommendations.
- Developed the web interface using Next.js.
- **Technologies:** AWS, API Integration, Next.js, TypeScript, Node.js, Gemini API.

Full-Stack Developer Intern

Soorcin

07/2024 – 08/2024 | Casablanca, Morocco

- Developed an e-commerce platform with user authentication, product management, and order management.
- Worked with SQL-based data management and web application development.
- **Technologies:** PHP, SQL, JavaScript, HTML/CSS.
